INCLUDED WITH THE U37 & U44 COOL SURFACE SYSTEM

The Cool Surface System allows the fireplaces rising heat to move safely up the chase without creating excessive surface temperatures that can damage HDTV's or other wall mounted valuables.

Rising heat is evenly vented forward into the living space above the chase

Rising heat is channeled safely past valuable wall mounted items such as a TV

Heat radiates forward from the fireplace window

COMFORT KIT

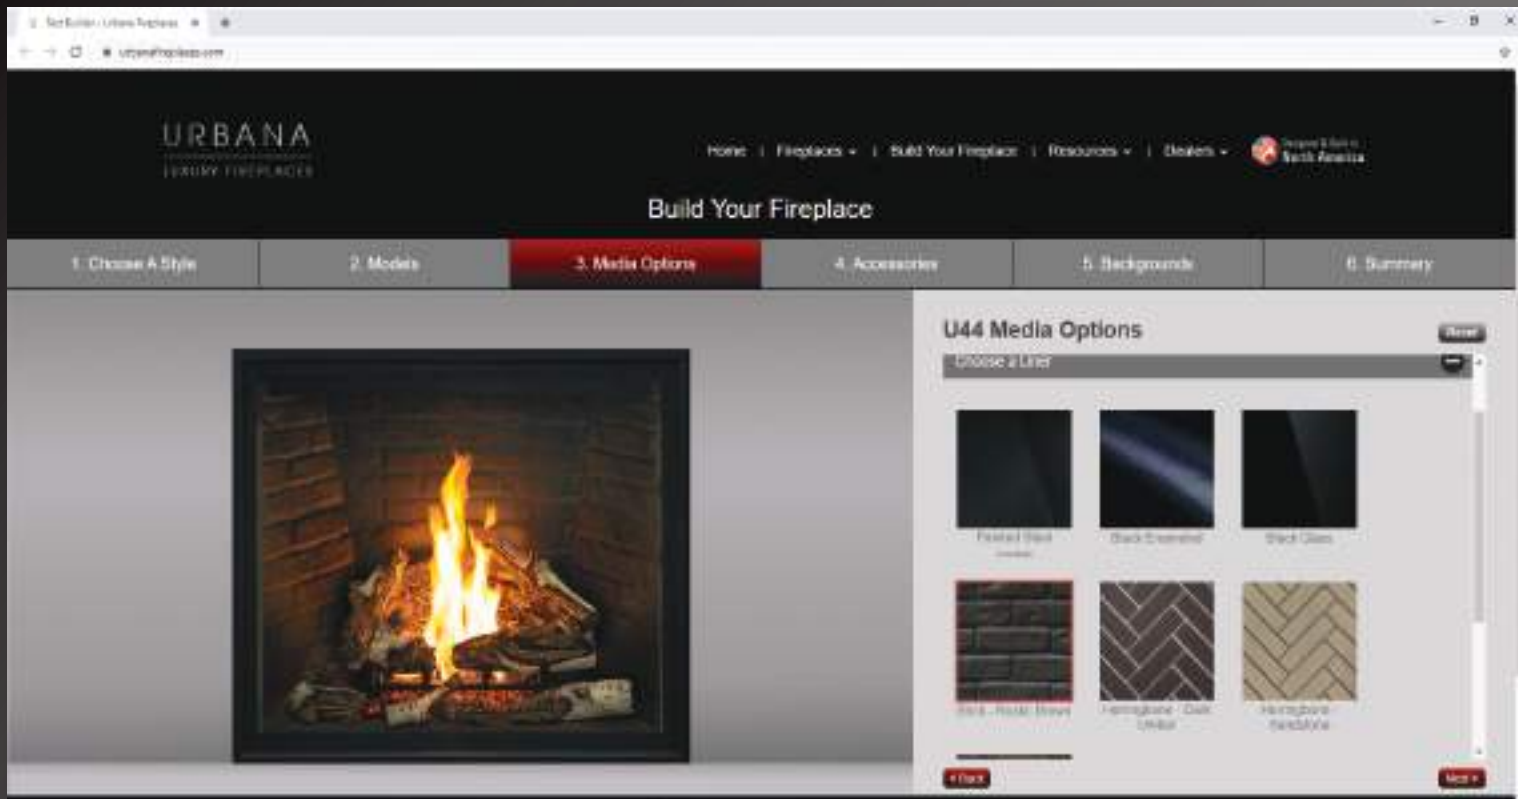

Our available Comfort Kit is an installation option that allows excess rising heat to be channeled outside through an exterior wall behind the fireplace. This setup allows you and your loved ones to enjoy a beautiful flame at comfortable temperatures.

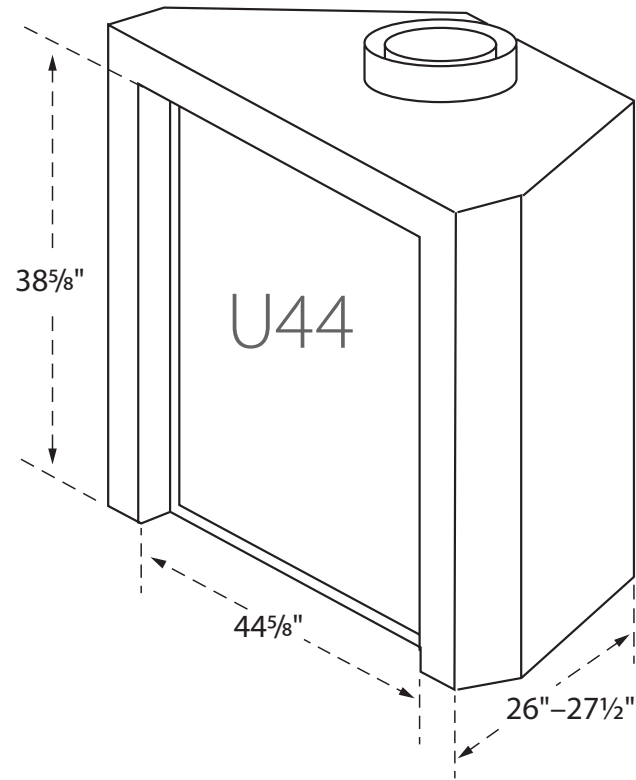

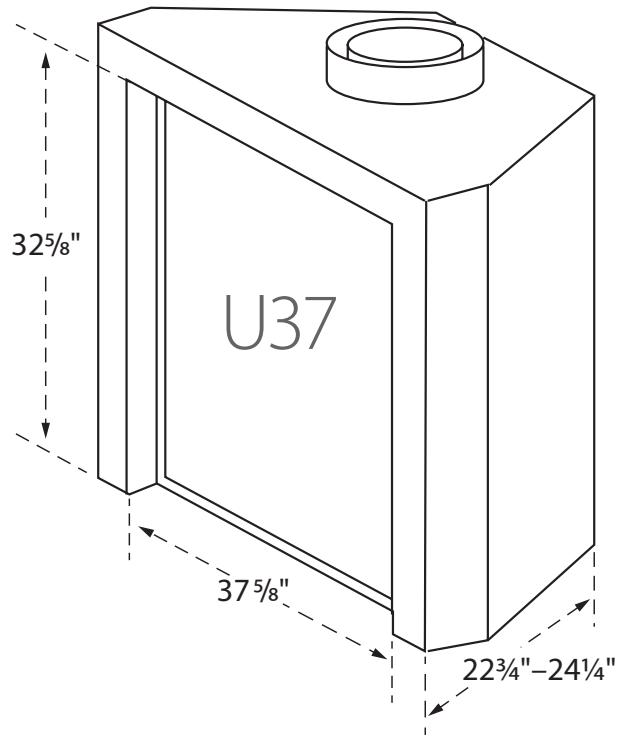

BUILD YOUR FIREPLACE

Find the ideal combination of logs and liners with the Urbana Fireplace Builder. This tool includes the ability for customers to receive a PDF of their fireplace as well as provide a list of authorized dealers in their area.
